Level	What it means for you (plain English)
CRITICAL	Immediate danger — like leaving the front door wide open. Stop everything and fix this today.
HIGH	Serious risk — like a broken lock that anyone could exploit. Fix within 24–48 hours.
MEDIUM	Moderate risk — a weak point that makes attacks easier. Plan to fix within the week.
LOW	Minor issue — a small gap worth tidying up. Fix during the next maintenance window.
INFO	Informational — no immediate risk, just something to be aware of.

Severity	Category	Finding	What This Means (Plain English)	Immediate Remedy
HIGH	Running Services	Risky service detected: Redis	Redis is a database that by default has no password. Anyone who can reach it over the network can read or delete all its data.	Set a strong password in redis.conf (requirepass directive) and make sure the port (6379) is blocked from the internet by a firewall.
HIGH	Running Services	Risky service detected: MongoDB	MongoDB in its default setup has no login protection, meaning anyone who can connect can see all stored data.	Enable MongoDB authentication immediately and bind it to listen only on internal IP addresses, not 0.0.0.0.
HIGH	Open Ports	Risky port open: 6379	Redis is a database that by default has no password. Anyone who can reach it over the network can read or delete all its data.	Set a strong password in redis.conf (requirepass directive) and make sure the port (6379) is blocked from the internet by a firewall.

Severity	Category	Finding	What This Means (Plain English)	Immediate Remedy
HIGH	Open Ports	Risky port open: 27017	MongoDB in its default setup has no login protection, meaning anyone who can connect can see all stored data.	Enable MongoDB authentication immediately and bind it to listen only on internal IP addresses, not 0.0.0.0.
HIGH	Database Security	MongoDB listening ? verify authentication	MongoDB in its default setup has no login protection, meaning anyone who can connect can see all stored data.	Enable MongoDB authentication immediately and bind it to listen only on internal IP addresses, not 0.0.0.0.
HIGH	Database Security	Redis listening ? verify authentication	Redis is a database that by default has no password. Anyone who can reach it over the network can read or delete all its data.	Set a strong password in redis.conf (requirepass directive) and make sure the port (6379) is blocked from the internet by a firewall.
MEDIUM	Running Services	Risky service detected: RpcEptMapper	RPC portmapper exposes attack surface	Refer to the technical detail above.
